# You're Invited

## Residents, Schools, Businesses and Community Groups

Singleton Council is pleased to announce we are participating in the Plastic Police® Program. This exciting local initiative is engaging local communities to tackle the issues associated with soft plastic packaging waste, generated by households and businesses.

The majority of soft plastic waste material currently ends up in landfill or presents as litter, impacting our local communities and environment. Did you know in 2015 only 2% of household soft plastic waste in NSW was being recycled?

The program will make it easier for communities to recycle soft plastics. It allows participants the opportunity to close the loop and help transform a waste into a resource. A key program goal is to turn the collected soft plastics into products that can be used by schools, communities and businesses.

Singleton Council will be participating in the regional pilot program as an aggregation point for soft plastics. Come along to the launch and find out how you can be involved in the program.

There will be presentations, static displays, an opportunity to sit on a bench made out of 100% soft plastics collected by a local Hunter Region community, and light refreshments.

**Where:**  
Singleton Waste Management Facility  
53 Dyrring Road, Fern Gully

**When:**  
Wednesday 27<sup>th</sup> September  
10am to 12pm

**RSVP** (for catering purposes)  
Singleton Council
